4. STRUCTURE and GOVERNMENT Around the world, churches are often incomplete or even anti-biblical in their structures. We have often seen visionary leadership usurped by a group of church members (committee or board,) rather than being led by apostolic authority. This is an attempt to have an accountability structure, but is much like the sheep leading the shepherd.

Accountability is required and shepherds do need to be led, trained and even corrected from time to time. Biblically, it is the more established apostolic leaders that will lead, direct and bring correction, NOT a committee. The purpose of a committee, board or team is to support the Vision by working out the practical, legal and functional aspects of it. At Home Church, our Lead Pastor sets the primary or “big picture” vision, and location pastors serve the vision with their own “ground level” vision that makes the big picture actionable at local levels.

- a. Home Church engages this biblical model with relational connection in both directions of being led and leading. It is a healthy and powerful way to keep accurate direction and teaching.
 - This keeps the sheep safe
 - This keeps the shepherds’ safe
 - This prevents a leadership ignominy

5. TEAMS, TRAINING EVENTS and LOCATION VISITS are all possible as God Leads our growing international leaders to cross borders, cultures and languages to share their own experience and areas of expertise as individuals or teams. You will also have the opportunity to serve the other locations in your own nation and in others should the lord make a way.

- a. We can't promise teams - but we promote all locations to our pastors and congregation and allow the Holy Spirit to speak to people to travel and strengthen any location that is connected to Home Church.

Established churches and start-up pastors are seeking out the strength of unity, the benefit of ongoing help and training, sound biblical instruction, and a proven method for *this time* that is reaching the lost and growing congregations in every nation, culture and language that we enter, without sponsorship or financial support.

Home Church does not recruit or seek candidates, rather we work through our existing relational connections to find inspired churches and leaders who want all that we offer.

Only after building a relationship and sharing our DNA, heart and methods do we consider inviting anyone or any church to join Home Church.
